

## **Fall 2015 Research Special Offer**

The ASL research team at Salk Institute is looking for Deaf people to participate in an fMRI experiment.

For this Fall 2015 Special, each Deaf person who is selected for the research will get \$75 dollars plus a gas-mileage reimbursement!

### **Who is qualified?**

You are Deaf of signing parents

Your age is between 18 and 45 years old

You know sign language since birth (or started learning before the age of 5 years old)

You are willing to fill out background and screening forms (we can help you)

You have no metal in your body

You are not claustrophobic (not afraid of being in a small, closed space)

The research focuses on understanding the relationship between the brain and language.

The experiment will take place at the University of California in Irvine

The experiment will take less than two hours to complete.

### **Please share this offer with your family & friends**
