 Place of Articulation, 26, 102. *See also* Sublexical elements
 Karen L., 82, 83
 sublexical structures, 3–10
 Planar locus, inflections via, 14
 Planum temporale, 109
 Play on signs, 10
 Poetic sign forms, 10
 Point-light displays, 25–26
 Poizner, H., 8, 26, 27, 35, 37, 40, 42, 82, 87, 173
 Predicates, 12
 Prelinguistic gestures, 22
 Pronouns, 21–22, 31, 122, 130
 Karen L., 85, 86
 noun/pronoun ratios, 203, 210
 Paul D., 125–126
 spatial indexes, 128–129 (*see also* Syntax, spatialized)
 Ratcliff, G., 34
 Rate, 14
 Rating-Scale Profile, of BDAE, 44–46
 of left-lesioned signers, 113–116
 of right-lesioned signers, 154–155, 156
 Reading comprehension, of left-lesioned signers, 112
 Reciprocity, 11, 13, 14
 Recursive rules, 14–16, 30
 Referential indexing. *See also* Indexing
 of children, 23–25
 Gail D., 67
 Reider, N., 38
 Repetitions
 Karen L., 86
 Paul D., 95–96
 Repetition test, 44
 Representational movement, testing, 167–170
 Rey-Osterreith complex figure, 56, 174, 182–185, 190
 Rhyming, 150
 Rhyming test, 46–47
 Rhythmicity, 44–45
 Richardson, J. C., 39
 Right hemisphere. *See also* Hemispheric specialization
 function of, 1, 31, 33–34
 hemispatial neglect, 56
 neuronal connections of, 158

- Right-lesioned signers
 brain, language and modality, 155, 157–158
 Brenda I. (keypunch operator), 141–144
 characteristic errors, 200
 characteristics of, 58
 dissociation of functions in, 204–206
 Gilbert G. (airline mechanic), 144–146
 hemispheric specialization, 159
 language function profiles, 154–155, 156, 157
 Sarah M. (artist), 133–141
 syntactic capacity, 200–204
 test results, vs. left-lesioned signers, 146–154
 visuospatial nonlanguage capacity, 193–197 (*see also* Visuospatial nonlanguage functions; Visuospatial nonlanguage functions, tests of)
 Rizzolati, G., 56, 185
 Robertson, L. C., 178
 Roots, 11, 15, 16
- Salot, D., 27
 Samar, V. J., 173
 Sarah M. *See* Artist (Sarah M.); Right-lesioned signers
 Sarno, J., 39
 Sarno, M., 39
 Schmidt, A., 157
 Semantic errors, Paul D., 103, 105–106
 Semantics, 99
 Sentence structure, 49, 69
 Separation of function. *See* Hemispheric specialization
 Seron, X., 162
 Short-term memory, 73–74
 Sign agility, 43, 44
 Sign aphasia. *See* Aphasia
 Sign comprehension, 45
 Sign discrimination, 43
 Sign Discrimination subtest, 147, 148
 Sign finding, 44, 45
 Sign fluency, 43
 Sign language. *See also* American Sign Language
 brain structures involved in, 155, 157–158
 deficits in, 163–164
 extracting movement from, 25
 Sign order, of Paul D., 125, 127
 Single signs, of Gail D., 72
 Siple, P., 8
 Slips of hand, 5, 7, 8, 82
 Smolik, E., 37
 Spatial agreement, Paul D., 97
 Spatial cognition. *See* Syntax, spatialized;
 Visuospatial nonlanguage functions
 Spatial components
 Gail D., 79
 inflections via, 14
 Spatial disorders. *See* Hemispatial neglect
 Spatial errors
 of Brenda I., 142–144
 of right-lesioned signers, 167
 Spatial functions
 in American Sign Language, 30 (*see also* Syntax, spatialized)
 specialization for, 197–200
 Spatial indexing
 of children, 23–25
 Gail D., 67, 129
 Karen L., 85
 Spatialized (spatially organized) syntax.
See Syntax, spatialized
 Spatial organization, ASL, 10–14, 16–21, 69
 Spatial orientation
 disorientation of Brenda I., 141–142
 tests of, 188–189
 Speech
 brain structure and, 3, 161–162
 discrimination of sounds, 26
 Sperry, R. W., 109
 Stiles-Davis, J., 23
 Stokoe, W. C., 3
 Structural layers, of ASL, 109–110
 Studdert-Kennedy, M., 5
 Stungis, J., 26
 Subcortical regions, 90, 91, 158
 Sublexical elements, 3–10, 44
 impairment of, vs. apraxia, 172
 impairments in left-lesioned signers, 122
 Karen L., 82–85, 86, 87, 130
 Paul D., 112
 testing, 42, 46–47
 testing, left-lesioned signers, 116–117
 testing, right-lesioned signers, 147–149, 150

- Substantives, 115
 Substitutions. *See also* Paraphasias
 Karen L., 82, 83
 Paul D., 99, 100–102
 rating of, 113–115
 of sublexical elements, 44
 Supalla, T., 5, 21, 48
 Swisher, L., 39
 Syntax, spatialized, 16–21
 vs. apraxia, 172
 of children, 23–25
 fixed and shifting frames of reference
 in, 20
 of Gail D., 73–75, 77, 79
 of Karen L., 85
 of left-lesioned signers, breakdown in,
 123–129
 in left- vs. right-lesioned signers, 152–
 154, 200–204
 notation conventions, 215
 vs. spatial mapping, 206–212
 testing, 42, 48–53
 test performance of left-lesioned sign-
 ers, 117–119
 Tachistoscropy, 35
 Temporal aspect, 11, 13
 Temporal processing, 30, 107
 Temporal qualities, 27
